EXPERIENCE

INFN Legnaro (PD) – *Internship*

June 2022 - July 2022

Internship in the Machine Learning department for
accelerator control systems. Training period in which
I had the opportunity to learn programming in python,
starting from the basics up to creating models of neural networks.

FEM, Data for Social Impact with R – *PCTO*

30h of training and exercises, 2021

Data Science training course, organized by Future Education Modena, in
February, March and April 2021 for a total of 30h of training and exercises
on R and TidyBlocks. which also included a Final Challenge (where I
presented "Fivenine").

PROJECTS

Fivenine – *Data Science Project*

This is a Data Science project, concerning the study during the
quarantine. The creation of the graphs was done in R, thanks to which I
was able to filter the data I needed to create them. Finally, the page slide is
written in JavaScript and everything else in HTML and CSS.
